the future is free

TETONCLIMBING.COM

Tetonclimbing.com is an experiment in what we believe is the future of climbing guidebooks. We will continue to ring you updated topos for all the Jackson Hole Area sport climbing areas, and we will continue to do it for free.

Please visit the site often, click on our sponsors, and if you feel the urge, donate to the cause. Whether it be $1 or one t-shirt, every little bit helps.

viva la revolucion!

NOTE: Some of the areas in this guide lie within Wilderness Area boundaries and/or National Park. Please obey all regulations specific to the area you are climbing.

!!! ROCK CLIMBING IS AN INHERENTLY DANGEROUS ACTIVITY !!! While the author of this guide has made every attempt to produce a highly accurate guide, it is only that. A guide. It is **NOT** an instruction manual. It is the users' resposibilty to utilize this information in a responsible and safe manner.

In plainspeak...**You were born with a brain, do your best to use it.**

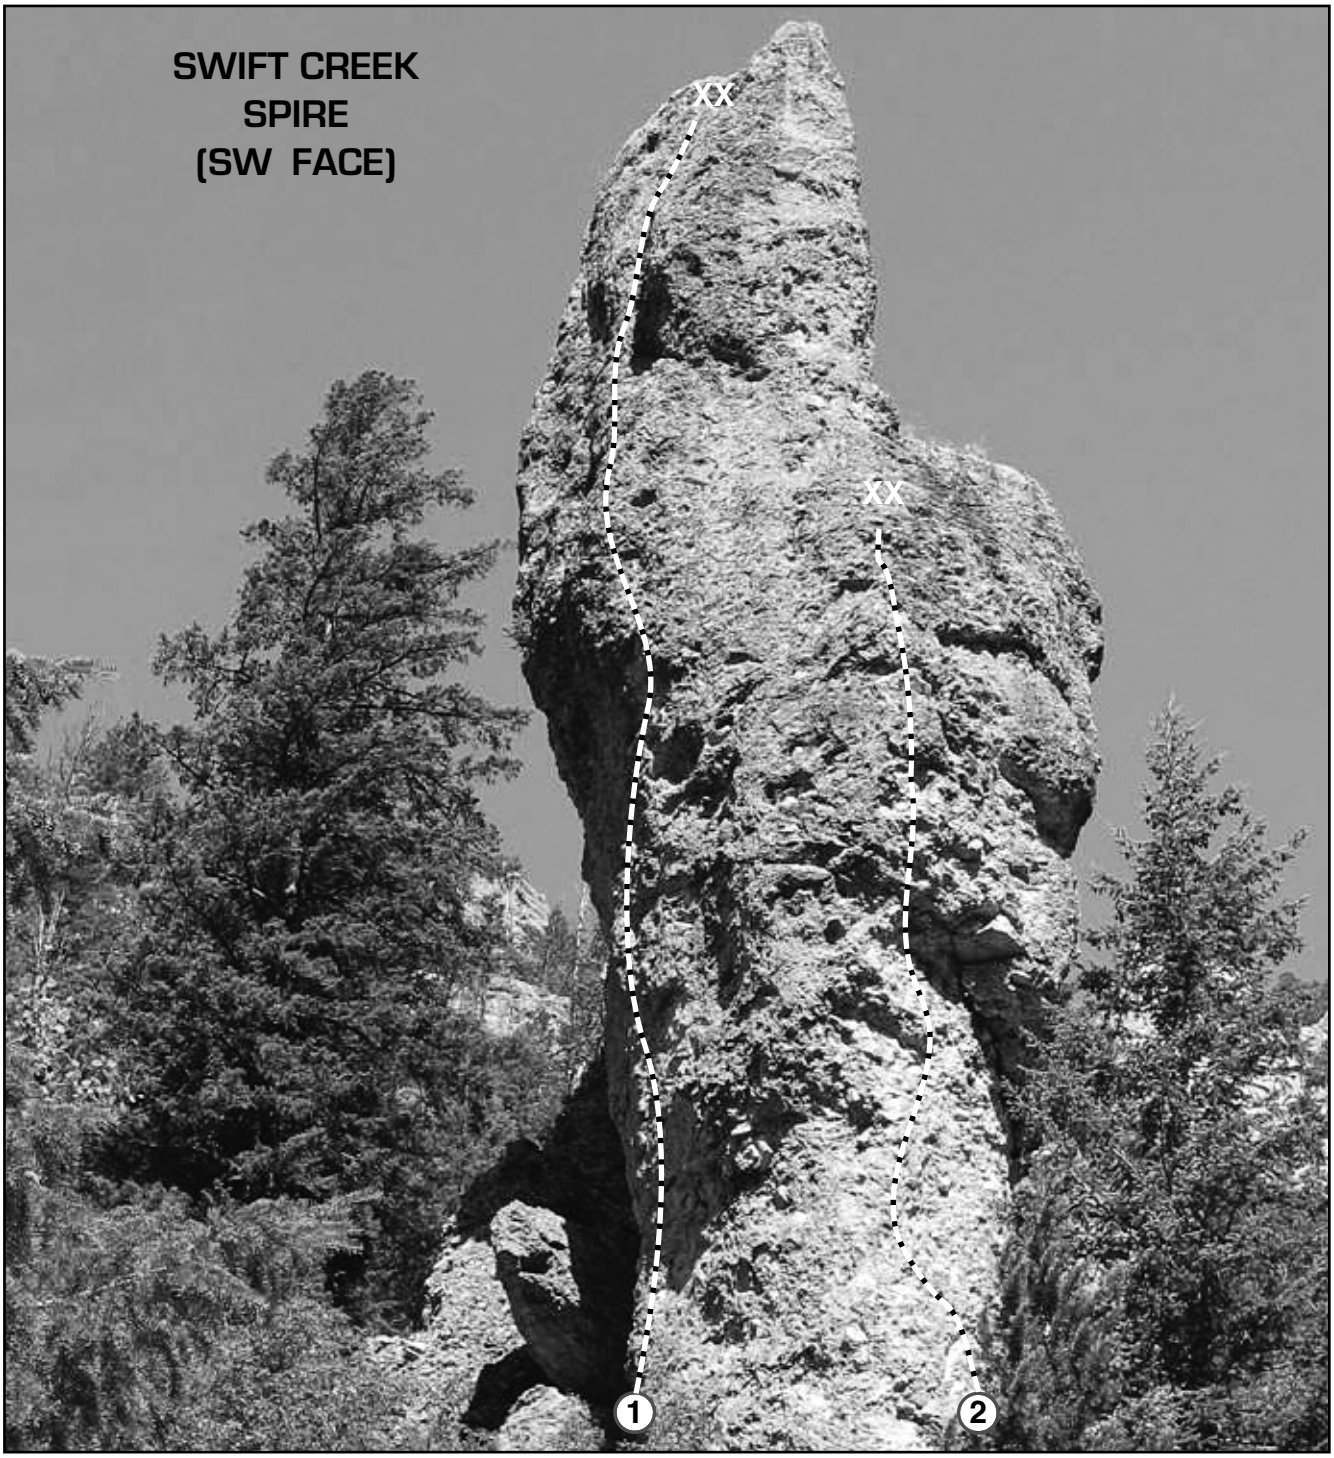
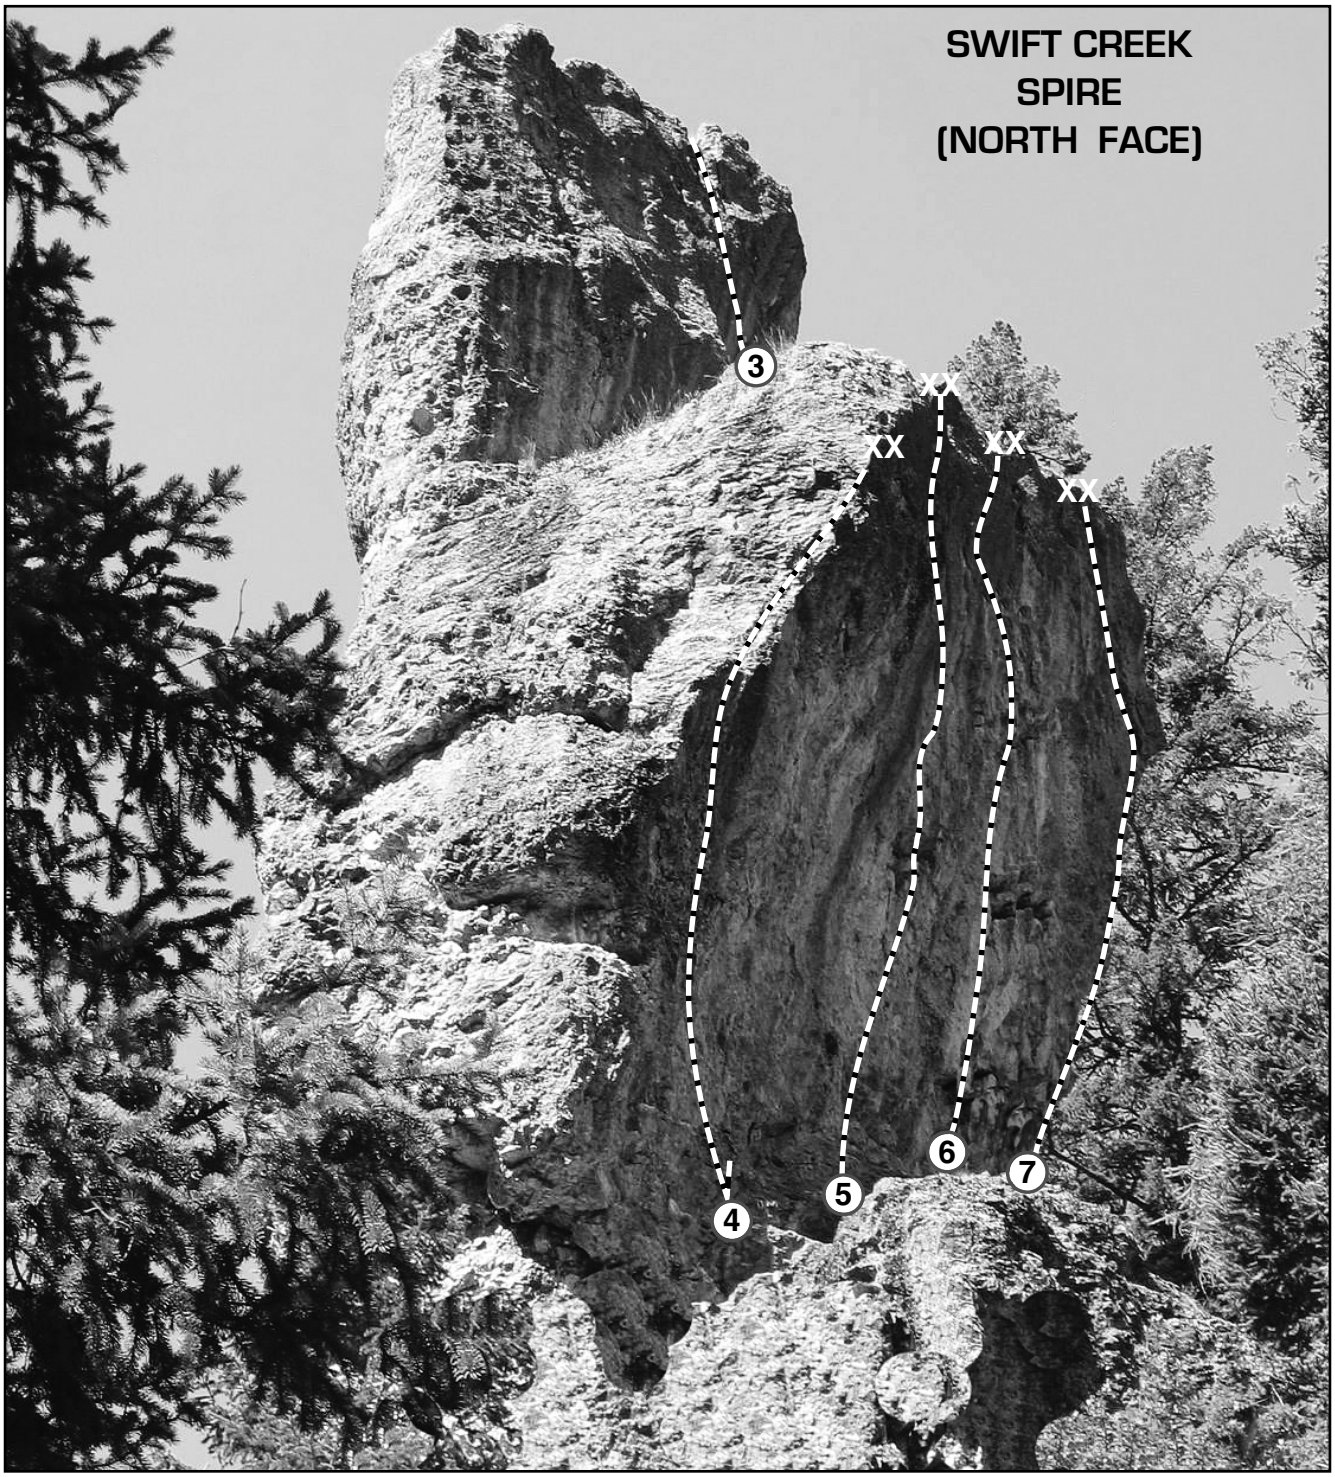
Swift Creek is the canyon just east of the town of Afton, WY. **Getting There:** Follow Hwy. 191 south from Alpine, WY. Turn east on 2nd Ave in Afton. Follow the road until it enters the canyon (turns to dirt). It winds up the canyon along the stream for a few miles with a number of ponds and hiking trails found on either side. Rock fins start appearing immediately.



1) Pull the Plug • 5.11b **** Steep, long and pumpy, 16 quickdraws This is a very good limestone sport climb. **Warning**: A 70 meter rope only BARELY reaches the ground when rapping from the summit. Its best to belay on top, lower your partner, and then do the two raps down

2) Open Project

TETONCLIMBING.COM



3) Original Route • 5.8

4) mental Hopscoth - 5.10d** Climb the arete clipping the north face bolts.

5Walkiing in LA - 5.12a*** The route climbs roughly the middle of the north face. Difficult flash.

6) Destination Unknown - 5.11c*** - 7 draws

7) Hustler - 5.12a**** - 9 draws - Excellent climb requiring hard overhanging pulls and delicate footwork. The route ascends the arete and face at the far right side of the north face. Its esiest to belay it from beneath the arete and not from the ledge.
